Data Analysis

Target Market

Content Production

ZUCKFLX PROPOSAL

Winston Shek, Krishna
Jha, Siddharth Laks

I How Do We Use the Given Data Set?

Genre/Form of Content

Based on the last three years, what forms of content are most popular?

Date Added/Release Year

When was content added/produced?

Country of Origin

Where is content experiencing growth?

Combination of Data

Analyzing trends in recent growth of titles from different states and forms of content

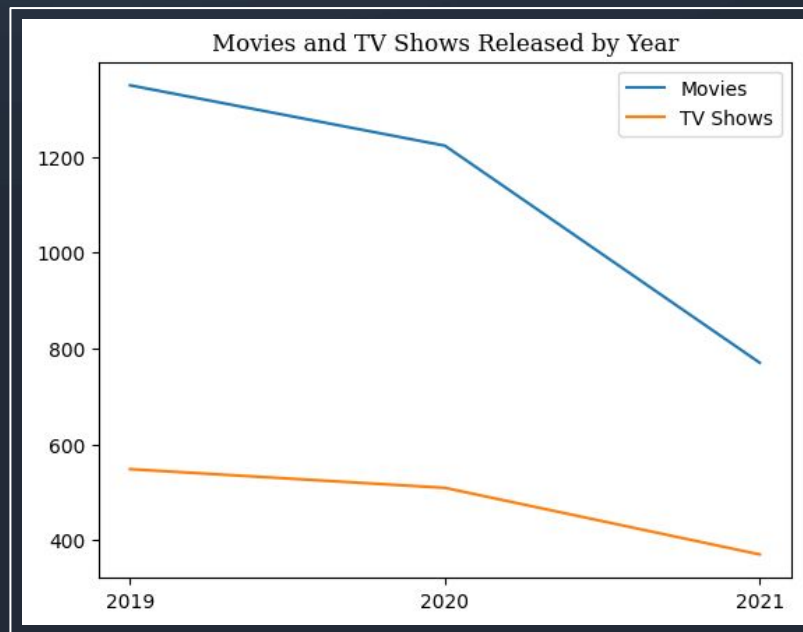

| Data Set Analysis

Movies or T.V. Shows?

Given a global scope, **movies** are more prevalent than T.V. shows in Netflix's library.

When observing the frequency of shows or movies by country, the distribution vastly differs per country.

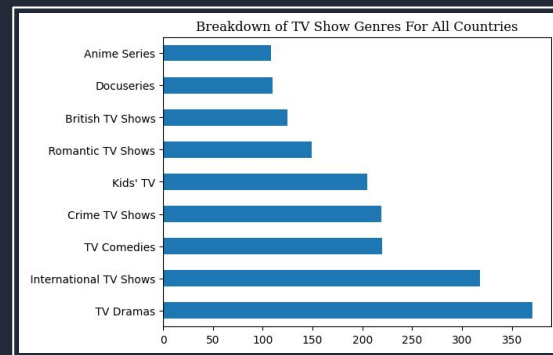

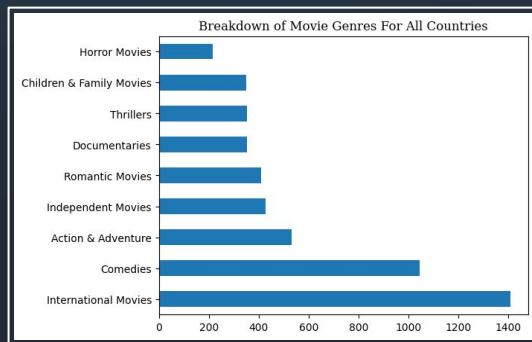

| Data Set Analysis

Most Popular Genres

When eyeing international expansion, it is **imperative** to cater content to local audiences.

Nonetheless, some content transcends borders such as popular TV dramas like **Squid Game**, **Stranger Things**, and other high-budget productions.

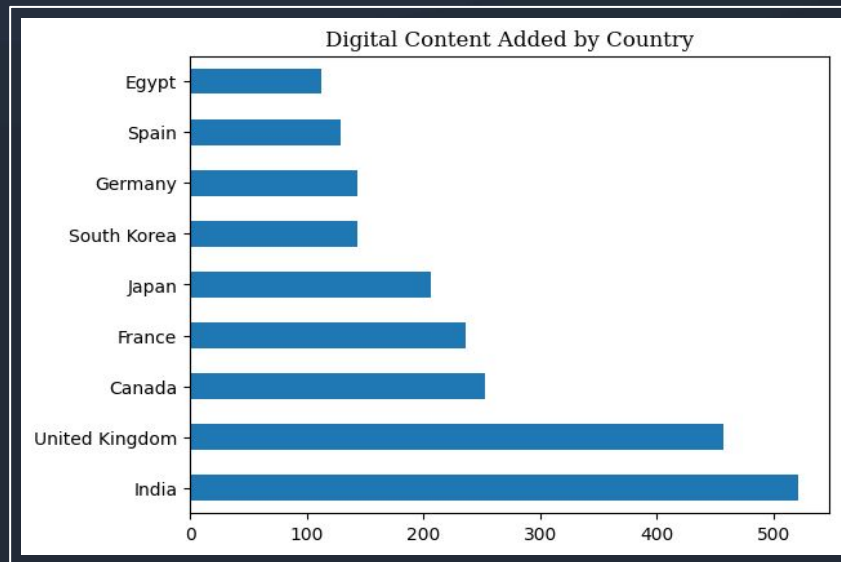

| Data Set Analysis

Countries

Excluding the U.S., **India** has the highest volume of digital content, a large majority of it being movies.

Per Netflix's CFO Spencer Adam Neumann, the **Asia-Pacific** region is the primary driver of average revenue per member (ARM) growth, signaling Asia's strength.
(Netflix @ BofA Media Conference)

| Market Recommendation

India

- India represents the **largest user base** for Facebook with **314.6 million users** (Statista). It also leads with other Meta products.
- India is set to have its disposable income rise by **14.6%** annually until 2027, and will become the **third largest consumer market**. **25.8% of all Indian households** will have \$10,000 in disposable income by 2027. (CNBC)

I Market Recommendation

India

- **India** features the **highest volume of content**, both T.V. shows and movies on Netflix within the past three years. This symbolizes the importance of the Indian market to Netflix.
- The Confederation of Indian Industry expects streaming revenue in India to **drastically increase from \$2.7 billion in 2023 to \$13 billion in 2030**, a sign of an opportunity for growth. (Washington Post)

| Content Recommendation

Focus on Movies

Movies are the primary boon of India's Netflix library, in part due to the emerging film industry commonly known as "Bollywood."

We **recommend** to focus on a large selection of movies in several of India's diverse dialects like Hindu, Tamil, and Telugu to cater to local audiences.

| Content Recommendation

Focus on These Genres

It is clear that the Indian population prefers **comedies and dramas** over other movies. This suggests the need to produce or buy established forms of this content.

| Content Recommendation

Focus on These Actors

Due to a limited budget, it is important to focus on content that is known to **attract public attention**.

As such, we have narrowed down the 10 most **popular Indian actors** to focus on which superstars supply the **greatest appeal for audiences**.

THANKS!

Any Questions?
